

The Logjam Need Not Be

A lot of administrative measures for solving India's inland port congestion

By **Sudhakar**

Sudhakar is a senior journalist and editor of the *Times of India*. He has been writing about the Indian economy and industry for over 20 years.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

Administrative Measures

There will also be a power to the executive to levy duty on imports and exports in the larger interest of the country and to levy duty on exports and imports - that too in the interest of the country.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.

The Indian inland port system is a mess. It is a mess of inefficiency, corruption, and delay. It is a mess that has been building up for decades.
